

Environmental Policy

Color Tech s.r.l. intends to adopt continuous improvement for its environmental management system in order to develop and apply ever more efficient and effective instruments to prevent hazards and safeguard the environment. By introducing a Management System Color Tech s.r.l. undertakes to develop and pursue the following objectives:

- ✓ To prevent, reduce or eliminate the production of pollution, where possible;
- ✓ To produce in such a way as to minimise the negative effects of manufacturing on the environment;
- ✓ To reduce consumption of resources, where possible;
- ✓ To constantly pursue prevention of negative environmental impact by keeping a constant check on aspects from which it could originate;
- ✓ To minimise the consequences of any negative environmental impact through controlled, responsible management of all our activities;
- ✓ To assiduously observe requirements of current laws and regulations;
- ✓ To pursue continuous improvement in terms of environmental management.

The company will ensure achievement of its general environmental objectives and individual goals by applying the following general principles:

- ✓ Environmental management will involve all the company's functions and activities at all levels;
- ✓ Environmental objectives and individual goals will be made public by distributing this environmental policy sheet, taken from the Environmental Management Manual and affixed to the company notice board;
- ✓ Objectives and individual goals will be progressively achieved through periodically updated environmental management programmes, monitored by means of periodical reports analysed by Management, who will review the system;
- ✓ New processes and materials will be selected and developed in such a way as to ensure services and products compliant with environmental regulations and whose use will have the minimum impact possible;

Our Environmental Policy is made known to the general public and parties involved through the press, internet and environmental communications, where necessary.
